

Haste*

30'+10'/level

1 round/level

Accelerates the actions of 1 creature per caster level. The affected creatures move and act twice as quickly as normal. Spellcasting is not accelerated, nor is the use of magic items such as wands, which may still be used just once per round. Multiple haste or speed effects don't combine.

Reversed, halves target's move and number of attacks per round (save vs. Spells). Haste and slow counter and dispel each other.
